Reef Spas 3D Visualizer

Using the latest 3D technology, you can view any of the Reef Spa range of hot tubs and swim spas using your phone, tablet or computer in full 360 degrees. This handy feature allows you to view, spin and zoom-in to explore the design features in more detail.

The Reef Spas 3D Visualizer uses the latest augmented reality software enabling you to see a virtual 3D model of the hot tub in your actual garden space. You can place virtual true-to-scale models of each tub in your very own surroundings.

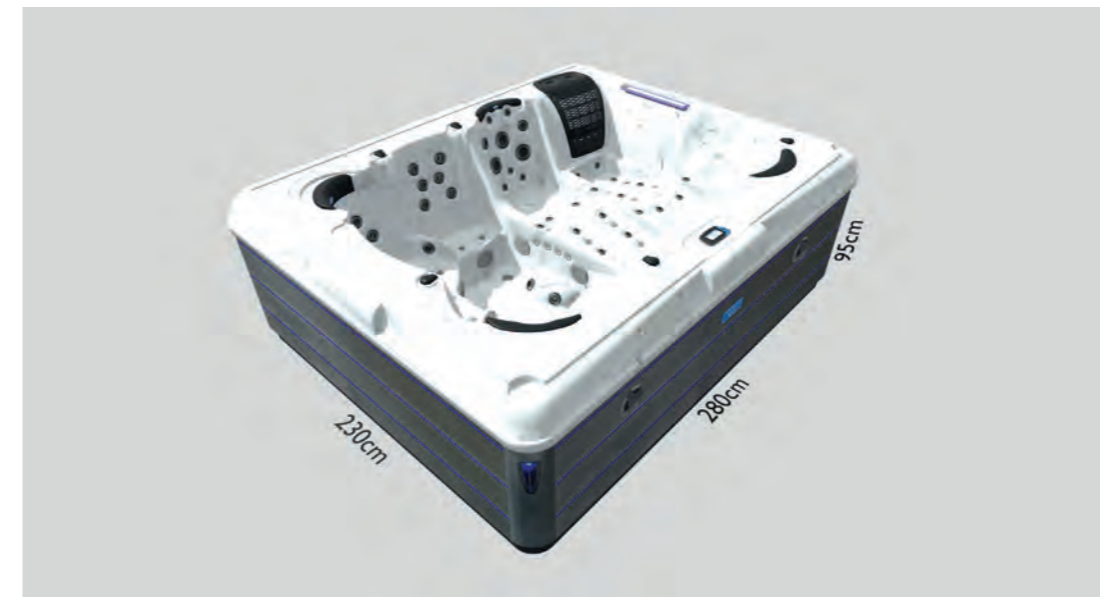

To try it simply scan the QR code (right) with the camera App on your device. Just follow the simple instructions to access the 3D Visualizer for yourself.

Why choose Reef Spas?

Reef Spas are proud to offer a wide selection of great value hot tubs and swim spas. Each model has been developed by our team of experts with almost 20 years of industry knowledge. Reef Spas offer the finest hot tubs and swim spas without ever compromising on design features or quality.

We understand that buying a hot tub or swim spa is a big investment for you and your family. That's why our experienced team are always on hand to provide the best advice so that you can choose the perfect hot tub or swim spa that best fits your budget and needs.

Your local friendly dealer will be happy to show you all the great features that Reef Spas has to offer.

Health Benefits

Relaxing in a Reef Spa allows you to escape to a calmer place, far away from the stresses of everyday life where immersing your body in warm water allows the body to recharge and revitalise itself.

Hydrotherapy is recognized as one of the best forms of therapeutic treatment for everyone, regardless of age. Being in water eases pressure in joints and muscles, while the heat increases blood flow and accelerates healing.

Hydrotherapy Massage Jets

To enjoy the best hydrotherapy massage, it is vital that you have not only the right number of jets but also jets in all the right places.

We design our hot tubs to target specific muscle groups, giving you the very best massage experience with powerful pumps and completely adjustable jets that offer a variety of effects and allow you to fully personalize your massage.

Ergonomic Seating Position

At Reef Spas we are all about comfort. Each model is designed with care to ensure the best and most comfortable experience.

The wide variation of ergonomically designed seating across the range includes captain's chairs, loungers and recliners meaning it's easy to find the perfect hot tub arrangement to suit your body, and your needs.

Latest Technology

Innovation is at the forefront of every Reef Spa design and we use the latest technology throughout including stunning LED lighting on our models, to help create the perfect mood.

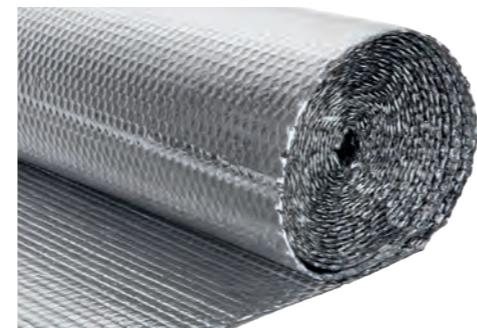

Most models use the latest touch-screen control panels which are intuitive, easy to use and allow you to change the temperature, adjust lighting and control your massage. For music enthusiasts every Reef Spa comes with Bluetooth connectivity making it easy to listen to your favourite tunes.

Maintenance Free Cabinet

Made from a high quality impact resistant composite in a chic and natural graphite grey, the exterior panels of Reef Spas are made to last.

Simple to clean, hard wearing and incredibly attractive, this quality material does not weather or stain and is virtually maintenance free.

HeatSave 2 Premium Insulation

Energy use is important to us and to you: The HeatSave 2 Insulation System, exclusive to Reef Spas, is designed to minimize heat loss, increase thermal retention and keep your costs as low as possible.

The case has a thick reflective insulating lining and the acrylic shell has several layers of ultra-efficient insulation which prevents climate ingress, thermal loss and recycles latent heat.

Steel Frame Construction

At Reef Spas we believe that steel frame construction is the best way to build a hot tub: The steel frame provides greater structural integrity than wood, far superior corrosion protection and has a much longer lifespan.

250% stronger than alternative wood frames, a steel frame does not expand or contract with moisture like wood, vastly increasing the durability, sustainability and structural stability of the case, and the hot tub.

High Tensile ABS Strength Base

Reef Spas are made with a solid, one-piece, ABS Plastic base providing a stable and rugged foundation that seals the bottom of the spa, locking in heat, sealing out moisture and protecting your tub. It also prevents any unwanted wildlife wanting to move in.

2 - 5 Year Warranty

When buying a Reef Spa you can be confident in the knowledge that you are buying a quality hot tub with the manufacturer's warranty offering a full 5 years on the steel frame construction against any defects, 3 years on the acrylic shell, and components such as pumps, heaters and controls have a full 2 year warranty.

Warranty Claims are subject to Reef Spas Terms and Conditions (available on request).

The outstanding Cayman Swim Spa which employs the latest T3 Truwave Turbine Technology to provide the ultimate swim experience. If you are looking for a deep swim spa with the power to accommodate the strongest of athletes or simply looking to enjoy swimming as part of your fitness regime then the Cayman is for you.

Once you've finished your fitness routine there are three hydrotherapy massage seats integrated at the rear designed for immediate muscle recovery. With its stunning looks including LED lighting throughout the Reef Spas Cayman certainly ticks all the boxes.

T3 - TruWave Turbine Technology

The T3 Truwave Turbine Technology creates a smooth, natural and extremely powerful counter-swim current. This wide and deep current can be fully adjusted to meet any swimming speed or ability.

Large Swim Lane

The Cayman provides a large swimming lane to accommodate the tallest of swimmers. This wide swim area enables you to perfect your technique without restrictions.

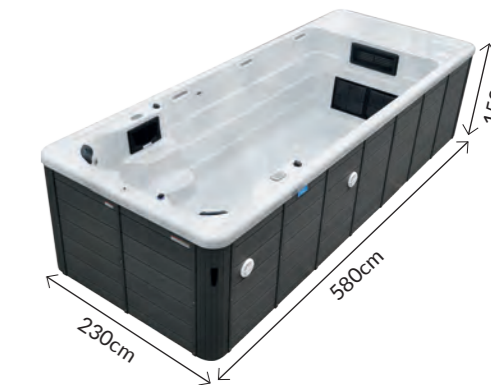

Multiple Cascade Waterfalls

The Cayman has 6 stunning cascade waterfalls each fitted with integrated multicoloured LED lighting to create a stunning "curtain of light" as the water cascades into the swim spa. Waterflow is easily adjusted by a simple dial.

SpaNet Touch Screen Control

With so much power and precision, the Cayman needs powerful and precise controls and the SpaNet control system gives you exactly that.
